Testimonial

To Whom It May Concern:

In my capacity as a commercial builder (Galloway and Lando, Hutchinson Builders), I have used the team at STP Consultants for over 15 years.

"More than ever the role of the structural engineer in the design and construction process has enabled builders to address value management solutions at an early stage in the development process so that alternate options can be evaluated and cost managed to provide savings while maintaining the integrity of the design.

As a builder who is constantly facing price and margin pressures, we attribute our success to the rigorous application of the above partnering process in devising and solving constructability issues that provide cost effective solutions.

STP's professional staff have always been available to provide us with the necessary resources to complete assignments to our total satisfaction within agreed time schedules and cost parameters.

STP Consultants are definitely a valued member of my design team.

Yours faithfully,
