

Our People

Trent Graham BEng
Structural Engineer

Trent has a strong background in structural design. His practical but technical viewpoint provides for cost-effective outcomes for his long-term client base.

Background & Experience

Trent joined STP in 2010, when opportunities arose in Mackay in January 2011 to expand his skill sets he made the move to develop his career. Whilst in Mackay Trent enhanced his skill set and learnt the importance of attention to detail when designing structures as well as the myriad construction techniques and materials available.

In December 2012 Trent relocated from the Mackay office to the Townsville office providing Trent with additional experience in multi-unit and aged care facilities in addition to other residential developments, as well as commercial, retail, institutional, industrial and health projects throughout North Queensland.

Trent is approachable and provides expert input to ensure the projects he is involved with can be completed with the best client outcomes. Trent is a valued member of the design team at STP Consultants.
